### Taylor Yard Bikeway/Pedestrian Bridge over LA River

**Scope of Work**

The scope of work consists of the design and construction of a new landmark/iconic pedestrian bridge with a bikeway connecting the existing bikeway along the west bank of the LA River to an existing road on the east side of the LA River. It will be approximately 400 ft. long with a 17 ft bikeway. The new bridge design will focus on visual aesthetics. Also, the project will include an on-grade railroad crossing. The overall intent of building this new bridge is to eventually connect the bike path at San Fernando Road to the LA River bikeway.
